

# REC PRO 75

High efficiency heat recovery units  
Non residential applications

Comply with ErP Directive 125/2009/CE and EU Regulation 1253/2014.

Classification: Non Residential Ventilation Unit (NRVU). Bidirectional Ventilation Unit (BVU).

- 7 sizes
- Airflow from 450 to max 5.500 m<sup>3</sup>/h
- Vertical and Horizontal models
- Motor EC 

## ELECTRONIC CONTROL

The control is already mounted and wired to the unit, complete with electronic controller, remote user interface with built-in temperature sensor, 4 NTC sensors and protection fuses.

### Functions:

- Manual or automatic fan speed control
- Heating/cooling 3-point valves control (or on/off electric heater)
- Free-cooling management
- Water coil antifreeze management
- Recovery defrost management
- Humidifier and water cooler management
- Alarm management
- Weekly clock setting
- BMS by Modbus - RS485 connection

## DESCRIPTION

The heat recovery units of the **REC PRO 75** series are designed to match the need to equip the buildings with ventilation systems which can combine low energy consumption, high aeratic performance and high indoor air quality.

In accordance with the new EU 1253/2014 norm, they are equipped with a high efficiency counter-flow plate heat recovery unit (in dry conditions, superior to the minimum efficiency prescribed by the law of 67%), with filters with extremely low pressure drops (F7 on fresh air and M5 on room air exhaust, efficiency calculated according to EN 779:2012) and with backward-curved blades fans, directly coupled with EC motors, guaranteeing power absorptions well below the limits indicated by the norm.

They can easily be integrated with conventional heating and air-conditioning systems and their construction is optimized for a ducted installation in false ceilings and for an all-seasons operation.

The series is available in both vertical and horizontal configuration and in 6 sizes with performances ranking from 450 to max 5,500 m<sup>3</sup>/h.

## CONSTRUCTION

- The casing is made with double skin panels, with 25mm thick rockwool insulation with fire reaction class A2S1d0; external panels are in prepainted steel, internal panels in galvanized steel.
- Integrated by-pass system with actuator, for free-cooling operations.
- Access to fans and filters sections is ensured by doors with hinges and locking devices; additional access is given to the filters thanks to lift-off panels.
- The units are complete with an electronic control device for the setting of the ventilation and temperature, monitoring of the status of the filters, week programming, defrost management and anti-freeze device for the additional water coil module.

## UPON REQUEST

REC 75 can be supplied with the following function components, assembled and connected, to be requested in stage of order:

- **PSTD** - Filters differential pressure switch.
- **DPS** - Differential pressure sensor.
- **AQS** - Ductable CO<sub>2</sub> probe.

# PERFORMANCE

The following curves represent the intake static pressures erogated by the units according to the airflow change (100%, 80%, 60% of the nominal speed) and the working area at the maximum ventilation speed. All performances reported refer to clean filters periodically cleaned.

 (5) At nominal airflow rate.

## SOUND LEVELS

The table lists the sound power values (SWL) in octave bands and totals; it also indicates the values of sound pressure level (SPL) at 1 m, 5 m and 10 m at supply, return and at the outside of the unit. All values refer to the operation of the ducted unit at FULL speed and at the nominal flow rate.

(2) incoming air at 13°C; condensation temperature 45°C

# REC PRO 75 ACCESSORIES

## PLM - Plenum with multiple connections

External module that can be mounted on both sides of the ventilation unit (horizontal or vertical) allowing the incoming or exhausting of the air on all sides. Can be completed with SKR1/SKR2 dampers and electrical actuators SSE.

CODE	TYPE	KG	NOMINAL PRESSURE LOSS (CURVE AT 90°) PA
5PL0070	75-450	21	6
5PL0071	75-800	23	9
5PL0072	75-1250	26	19
5PL0073	75-1900	30	14
5PL0074	75-2800	39	8
5PL0075	75-3800	44	14
5PL0082	75-5400	59	12

The plenum is provided with 10 possible aeraulic connections (6 of which are closed by insulated plates A) blocked with self-drilling screws as indicated in the following figure:

# REC PRO 75 ACCESSORIES

Example of installation:

Remove and block again the plates on the unused connections in order to create the desired layout. This operation has to be made before positioning the plenum.

# REC PRO 75 ACCESSORIES

## SKR1 (Front) / SKR2 (Lateral) - Ad justing Dampers

Made of the frame and opposing aluminum fins, with pin for coupling to the electrical actuator.

It can be installed directly on each unit air inlets, in those of the plenum (PLM) or CCS / CDX modules.

**SKR 1:** Front / upper - lower (with plenum) air damper. **SKR 2:** side air damper (with plenum).

The dampers are supplied without actuator. If requested SSE actuator can be supplied assembled on the dampers.

1=SKR1  
2=SKR2

5SE0090	SKR2 75-5400	810x720	8.1

## SSE - Damper actuator

On/off type - 230V-50Hz, 1,5 W.

The actuator is not available separately. If requested, it is supplied assembled on the damper SKR1 / SKR2.

## GAT1 (Front) GAT2 (Lateral)

### Flexible connection

It allows a flexible connection between the base unit or its external modules and the air ducts, in order to prevent the transmission of vibrations to the latter. The dimensions coincide with the corresponding dampers SKR1 / SKR2.

**GAT 1:** Front / upper - lower (with plenum) flexible connection

**GAT 2:** Side flexible connection (with plenum)

## BCC1 (Front) / BCC2 (Lateral) - Round adaptor for circular ducts

It allows the connection between the base unit or between its external modules and circular ducts.

Made of galvanized steel and provided with coupling plate (suitable for SKR1 / SKR2 and GAT1 / GAT2).

**BCC 1:** Front / upper - lower (with plenum) round adaptor for circular ducts - **BCC 2:** Side round adaptor for circular ducts (with plenum)

## TPR-H / TPR-V / TPR-CH / TPR-CV - Roof cover

**TPR-H:** Horizontal unit - **TPR-V:** Vertical unit - **TPR-CH:** Horizontal unit with external module - **TPR-CV:** Vertical unit with external module.

The roof cover, in pre-painted steel, is necessary whenever the units are outdoor installed and could be exposed to bad weather.
